Keynote Addresses

Ignorance of insight? An integrated and adaptive model for the long term sustainable management of tourist interactions with marine wildlife
James Higham................................................................................................................. 2

The leap of faith: Will ethics in tourism go gently (or rage) into that good night?
David A. Fennell............................................................................................................ 3

Developing Lifeguard Services for Tourist Resorts: Legal, Training and Quality Service Considerations
Jeff Wilks......................................................................................................................... 4

Extreme marines: the rise of high risk marine tourism
Mark B. Orams................................................................................................................ 5

Ludic challenges of coastal and marine tourism
Marc L. Miller................................................................................................................ 6
Conference Papers

Theme 1: Marine Wildlife Tourism

Origin and development of whalewatching in the state of Aragua, Venezuela: Laying the groundwork for sustainability
Jaime Bolaños-Jiménez, Auristela Villarroel-Marín, E.C.M. Parsons, & Naomi A. Rose.................................................................16

When and where? The whale-watching industry and the future
Rochelle Constantine & Lars Bejder.................................................................28

Dusky Dolphin (Lagenorhynchus obscurus) occurrence patterns near Kaikoura, New Zealand: Observations from tour boats 1995-2006
Adrian Dahood, Bernd Würsig, Zach Vernon, Ian Bradshaw, Dennis Buurman & Lynette Buurman.................................................................32

‘Jaws or Jawsome’? Exploring the shark-diving experience
John Dobson .......................................................................................................37

Marine wildlife tourism opportunities in Baja California
Sara M. Earhart, Maile C. Sullivan & Marc L. Miller.............................................50

The sustainabale development of the whale watching industry: A case study approach
Sophia Foley & Marian Binkley ...........................................................................58

Speaking from Experience: Whale and Dolphin Watching Boats as Venues for Marine Conservation Education
Paul Forestell & Gregory Kaufman ......................................................................63

The growth of whale and dolphin watching tourism in Oceania
Lydia Gibson, Simon O’Connor & Tania Duratovic..............................................68

Grunion Greeters in California: Beach Spawning Fish, Coastal Stewardship, Management and Ecotourism
Karen Martin, Andrew Staines, Melissa Studer, Chris Stivers, Cassadie Moravek, Phillip Johnson & Jennifer Flannery1 ..................................................73

Dolphin watch tourism: A cross-case comparison of two differing examples of sustainable practices and pro-environmental outcomes
Gayle Mayes & Harold Richins ...........................................................................87

Watching endangered orcas: The role of communication in balancing marine tourism and sustainability
Tema Milstein.......................................................................................................104

Sustainable versus UnSustainable Dolphin tourism in the Caribbean: A case study in the Dominican Republic
E.C.M. Parsons & Naomi A. Rose ........................................................................114

A wildlife tourism auditing framework…can we build it?
Kate Rodger, David Newsome & Amanda Smith..................................................128
Adaptive Management for a Recovering Humpback Whale Population in the Great Barrier Reef Marine Park
Sarah Salmon & Kirstin Dobbs ................................................................. 132

Meeting Flipper in the wild: Managing swim with dolphin tourism in Australia
Heather Zeppel ...................................................................................... 146

Theme 2: Marine Protected Areas

Quantifying community perceptions of marine environments for Marine Protected Area planning: When is the Reef too crowded?
Barbara Bollard-Breen & Daniel Breen .................................................... 168

Tourism as basis for sustainable development in protected coastal areas?
Svein Frisvoll & Katrina Rønningen ....................................................... 180

The law and policy regulating marine parks in the Asia Pacific – de legere ferenda
Mary George .......................................................................................... 186

Quantifying community perceptions of marine environments for Marine Protected Area planning: When is the Reef too crowded?
Nina Hall & Jim Sillitoe ........................................................................ 201

Impacts of the 2004 Tsunami Disaster on Thailand’s Marine Park Tourism: What Did We Learn?
Somrudee (Meprasert) Jitpraphai & James W. Good .................................. 213

Tourism in the marine national park of Gujarat
Prabha Ranade ...................................................................................... 219

Theme 3: The Cruise Ship Industry

Cruise Ship Tourism Research: A Critical Review
Brigid Casey .......................................................................................... 236

Protecting paradise: Minimizing the downside of cruise tourism
Ross A. Klein ........................................................................................ 242

The socio-economic impacts of cruise tourism: A case study of Croatian destinations
Zrinka Marusic, Sinisa Horak & Renata Tomljenovic .................................. 258

Development of a supply chain model for the cruise industry
Funda Yercan & Frank Bates ................................................................. 275
Theme 4: Coral Reefs and Scuba Diving/Snorkeling

Keeping and I (and 1.9 million others) on the reef: The sustainability of tourism on the Great Barrier Reef
Alexandra Coghlan & Bruce Prideaux.................................................................293

Fishers, divers, scientists, lawyers, and Marine Protected Areas: The U.S. experience in protecting coral reefs
Robin Kundis Craig .........................................................................................307

Why Dive? And Why Here? A study of recreational diver enjoyment at a Fijian eco-tourist resort
Clare Fitzsimmons .........................................................................................322

Upgrading to a better model - a new style of planning in the Great Barrier Reef Marine Park
Sally Peut & Peter McGinnity ........................................................................342

Keeping the Great Barrier Reef Great – The development of an innovative sustainable tourism partnership
Lorelle Schluter, Sally Peut & Lisha Mulqueeny ........................................346

Loose lips and sinking ships: Analysing the role of intergovernmental relations in the creation of artificial reefs for sustainable scuba diving tourism in Australia
Paul Stolk ........................................................................................................349

Theme 5: Guides, Interpretation and Education

The role and presence of a guide: Preliminary findings from swim with seal programmes and land-based seal viewing in New Zealand
Laura Boren, Neil Gemmell & Kerry Barton ..................................................366

Educating visitors to the Pacific coast of Washington State: Information dissemination and marine management
Rachel More Gregg..........................................................................................381

Designing and Assessing Marine Educational Signage with a Marine Environmental Philosophy: Pilot Studies in Puget Sound, Washington State
Katrina A. Lassiter & Marc L. Miller .................................................................388

Whale watching tour guides: Communicating conservation effectively
Sheila E Peake ..................................................................................................404

Environmental education on Rangitoto Island: What do visitors learn from Auckland’s Marine volcano?
Christian Wittlich ............................................................................................423

Marine wildlife tourism: Education and conservation benefits
Heather Zeppel & Sue Muloin .........................................................................430
Theme 6: Marine Adventure and Sports Tourism

Dropping in: A case study approach to understanding the socio-economic impact of recreational surfing and its value to the tourism industry
Neil Lazarow, Marc L. Miller & Boyd Blackwell .......................................................... 448

Family Sailing in the Archipelago Sea, between Finland and Sweden
Ole Rud Nielsen ........................................................................................................ 462

A geography of charter boat operators in New Zealand
Hamish G. Rennie & Jill Thomson ........................................................................... 467

Theme 7: Marine Festivals, Events, and Heritage

Coastal and Marine Heritage for Tourism: Examples from the North Atlantic
Carl Cater & Erlet Cater .......................................................................................... 487

Interest in “virtual” and “real” shrimp related experiences among coastal and shrimp festival tourists in South Carolina, USA
Laura W. Jodice & William C. Norman .................................................................. 492

Salt and maritime heritage in the Canary Islands
Juan Manuel Santana-Pérez .................................................................................... 509

Environmental impacts and indicators for marine-based sporting events
Vikki Schaffer, David Foster & Meredith Lawley .................................................... 519

Theme 8: Coastal and Island Tourism

Developing a Strategic Tourism Plan for Northeast Iceland: Highlands, Whales and the Yulelads
John Hull ................................................................................................................ 540

The role of physical planning in linking disaster risk reduction to the Development Process: Coastal Tourism Reconstruction in Grand Anse, Grenada
Roché Mahon ........................................................................................................ 541

At the crossroads: Island tourism in Malaysia
Badarussin Mohamed & Azizi Bahauddin .............................................................. 558

Linking beach recreation to weather conditions. A case study in Zandvoort, Netherlands
Alvaro Moreno, Bas Amelung & Lorena Santamarta .............................................. 565

Responsible environmental practices in Puerto Princesa, Palawan, Philippines
John C. Gray .......................................................................................................... 577

An integrated coastal management strategy for a proposed marine tourism conservation estate at Nelson Mandela Bay, South Africa
Peter B. Myles ........................................................................................................ 579
Obstacles to the Adaptive Management of Coastal and Marine Tourism Destinations
Anna Palliser ............................................................................................................587

Sexual harassment: Not just a coastal problem
Jill Poulston ..............................................................................................................588

Ecological footprint analysis of road transport related to tourism activity: The case of Lanzarote Island
Roberto Rendeiro Martin-Cejas ...............................................................................592

Evaporating the Essence: Towards an Understanding of sub-Antarctic Visitation
Eric J. Shelton ..........................................................................................................602

Impacts of the Proposed Red-Dead Canal on Sustainable Tourism Development at the Dead Sea
Edith M. Szivas..........................................................................................................611

Theme 9: Research, Sciences, and Marine Tourism

Meeting obligations under the Marine Mammal Protection Regulations 1992 (MMPR) when scientific knowledge is limited
Laura Allum ..............................................................................................................616

Unifying ecological and social sciences into a management framework for wildlife based tourism: A case study of feeding stingrays as a marine tourism attraction in the Cayman islands
Christina A.D. Semeniuk, Wolfgang Haider & Kristina D. Rothley ........................621

Development of marine research tourism in Australia
Peter Wood................................................................................................................627

Poster Abstracts

Using fuzzy AHP to develop evaluation criteria for multifunctional development of fishing harbors
Chung-Ling Chen......................................................................................................640

Proposal for the preservation and rational use of the salt mines from Eastern Venezuela
Montserrat Esteve & C. Romero...............................................................................641

Tourism representations of rurality and ‘trail by space’ in Norwegian rural communities
Svein Frisvoll ............................................................................................................642

Disappearing Hector’s and Maui dolphins – the last chance to see them?
Jacqueline Geurts .....................................................................................................643
Are we loving our whales to death? Ensuring the sustainability of a growing whale-watch industry
Maryrose Gulessarian, Megan Kessler, Luciana Möller & Rob Harcourt

Variation in the Acoustic & Behavioural Responses of Inshore Bottlenose Dolphins (*Tursiops aduncus*) to Different types of vessels
Elizabeth R. Hawkins

Responses of Hector’s dolphins (*Cephalorhynchus hectori hectori*) to vessel Activity in Akaroa, NZ
Emmanuelle Martinez, Dianne H. Brunton & Mark B. Orams

The value of threatened species to tourism in New Zealand
Mark N.H. Seabrook-Davison, Dianne H. Brunton & Mark B. Orams

Tourism affects the behavioural budget of common dolphins (*Delphinus sp.*) in the Hauraki Gulf, New Zealand
Karen A Stockin, David Lusseau, Vicky Binedell, Nicky Wiseman & Mark Orams

**Workshop Presentation Abstracts**

**Workshop I: Seafood Tourism and Aquaculture**

Northern Coastal Inspiration: Chefs Sharing Culinary Traditions Across the Northern Periphery
*John Hull*

Introduction to seafood tourism
*Laura W. Jodice & William C. Norman*

**Workshop II: Interpretation and Education in the Marine Environment**

Marine Interpretation and Marine Guides ~ how can we make a difference?
*Deborah Benham*

Guiding Effectively: experience, knowledge and decision making to reduce tourist impact on New Zealand
*Laura Boren*

Citizen Scientists as Docents Impact Policy
*Karen Martin*

Guiding and the Challenges of Incorporating a Model for Creating Cognitive Dissonance in the Visitor
*Jonathon Spring*

How to capture and captivate tourists to make them care, comprehend and change
*Caroline Thalund*

Interpretation of Marine Research
*Peter Wood*
